SUBJECT INDEX TO VOLUME 14

Aluminum casting, and thermal stress predictions, 571

Coupled thermoelastic equations, "exact" solution of, 215
Coupled quasi-static linear thermoelastic problem, 333
Cross-ply cylindrical panels, thermoelastic solution for, 227
Cross-ply laminated plates, and refined plate theories, 419

Dynamic thermoelastic problems and the Galerkin method, 143

Elastic plate, stresses from sudden hole, 455

Fiber composites, and fiber-matrix fracture, 1

Half-space subject to smooth heating of boundary, 241
Hollow cylinder:
  axisymmetric stress analysis, 201
  heated by a moving line source, 105
  and asymptotic solutions to thermal stresses, 19

Infinite elastic solid with a cylindrical cavity, 353
Infinitely long annular cylinder, and heat and moisture, 439

Isotropic solids, thermoelastic potential functions, 309

Laminated and nonhomogeneous plates, thermal bending of, 285
Layered plate with interface flow, cyclic heating of, 33
Linear thermoviscoelasticity, and data dependence, 541

Magnetothermoelasticity and half-space problem, 65
Metal matrix laminated plates, and thermal buckling, 479
Multilayered cylinder and thermal shock, 47

Nonhomogeneous prismatic bars, thermoelastic bending, 499

Optical coatings, prediction of damage to, 255
Orthotropic cylindrical shells, and perturbation solution, 465

Semi-infinite plane and moving Gaussian heat source, 129
Surface thermoelastic waves, energy-flux vector, 563
Symmetrically laminated composite plates, thermal buckling, 519

Thermoelastic beams, appropriate boundary conditions, 193

Thermoelastic contact of layer and half-plane, 371
Thermoelastic materials with voids, Galerkin-type solution, 409
Thermoelastic solid with cavity, and vibrations, 161
Thermoelastic solids, mixtures of, 389
Thermoelastic sphere, and free vibrations, 173
Thermoelasticity, nonlocal, 121
Thermoelasticity and ray series expansions, 85
Thermoviscoplasticity equations, and material properties, 271
